

Private APN

Secure Business Mobile Data

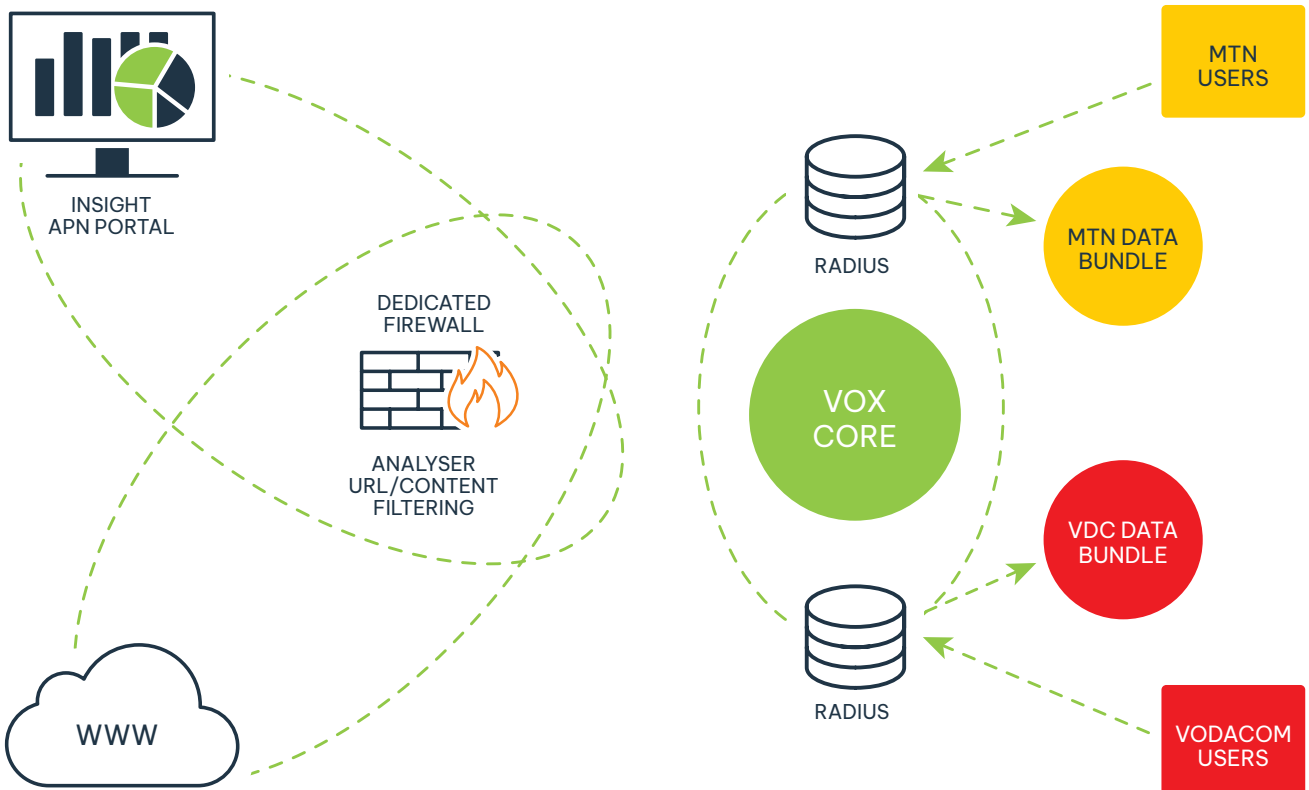

- Connects automatically for uninterrupted Internet access
- MTN Fixed LTE-A offers extensive coverage
- No bill shock thanks to a once-off Top Up or monthly recurring Data bundle
- 2GB of monthly inclusive data to monitor the status of your Fibre line

PRODUCT OVERVIEW

Vox Private APN provides secure access to company resources for a mobile workforce or a M2M (machine to machine) solution. Private APN is a turnkey solution.

Vox Insight is our cloud-based APN management platform giving customers visibility and management of the Private APN data solution.

HOW IT WORKS

MAIN FEATURES AND BENEFITS

Features of Vox Private APN

- Connect from anywhere in S.A. where sufficient MTN or Vodacom data coverage exists.
- Integrate with existing security policies on the LAN/WAN.
- Customer provided APN name and IP address range.
- Secure access to the MPLS network .
- Create data use policies online via the Insight portal.
- Soft-lock & unlock users online.
- Data use trending and usage reports.

Benefits of Vox Private APN

- Secure access to the corporate network.
- Configure Static, Dynamic, Public or Private IP addressing.
- Apply user management policies via the corporate firewall.
- Apply data usage policies to user groups or branches.
- Single bill to manage.

Who to sell Private APN to?

- Secure out of office users with custom requirements.
- Sales or field service force who need to access specific servers or websites for work data uploads/ downloads.
- Multi-nationals requiring GDPR or similar compliance.
- Users in the telemetry industry (transportation, mining, agriculture, resource management and manufacturing).

Private APN Service

- Specific to a network operator so a Private APN will be required for each network provider. Currently MTN and Vodacom are supported.
- A data bundle must be selected sized to the customers' requirements. Data bundles range in size from 2.5GB to 1000GB.
- SIM cards must be supplied if Vodacom. Existing MTN SIMs can be ported or new MTN SIMs can be provided.
- Option of individual Data Bundles (Forward Billing) or Shared Data Bundles (Reverse Billing). Out of Bundles Rates apply.

Private APN Option	Use Case	Limitations
Private APN	VPN connection to the customer Network ensuring secure connectivity for only authorised users.	No Internet breakout. Users can only connect to the corporate network.
Modem to Modem APN	Vodacom Only. One SIM-enabled Device will talk directly to another over the Vodacom Network. Great for Machine to Machine communications requirements or to cost effectively extend the LAN to a remote site that doesn't have large data requirements.	Mobile router must have sufficient functionality
International (Roaming) APN access	User travels out of country but still needs to securely connect to the corporate network. Additional Ts&Cs apply.	Can be very costly, as international roaming rates can be high. Only used as a last resort when other options like VPN are not available.
